DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group II, claims 12-20 in the reply filed on October 20, 2006 is acknowledged. The traversal is on the ground(s) that: (1) "[W]ith respect to the separation of method claims 12-20 (Group II) and method claims 21-34 (Group III), Applicants request rejoinder of pending claims 21-24 and 34-36 with method claims 12-20 in view of the above-amendment. All of dependent claims 13-24 and 34-36 now share a common independent claim, i.e., claim 12. Accordingly, the search and examination of all of claims 21-24 and 34-36 would not require an undue burden"; and (2) "[W]ith respect to the apparatus claims 1-11, Applicants also request rejoinder of these claims with the elected method claims. According to MPEP §803, if the search and examination of an entire application can be made without a serious burden, the Examiner must examine it on the merits, even though it includes claims to independent or distinct inventions. As evidence of the undue burden, the Examiner has listed that class 422, subclass 68 is to be searched for Group I and class 435, subclass 6 is to be searched for Group II. In view of: i) the likelihood that a significant portion of the patents belonging in class 422, subclass 68 would also be classified in class 435, subclass 6; and ii) the fact that the computer searching software used by the Examiner enables the Examiner to combine the search for patents in multiple subclasses without having to view duplicates, the search of the extra subclass(es) would not amount to an undue burden on the Examiner to consider all of pending claims 1-24 and 34-36. As such, Applicants respectfully request that the Examiner rejoins Groups I and III with elected Group II".

Art Unit: 1634

After carefully reviewing above arguments and the amendments, the examiner agrees to combine claims 1-24 and 34-36 together. However, this application contains claims directed to the following patentably distinct species:

- (1) separating and purifying nucleic acids without pressurizing the inside of said accommodation part of the apparatus (claims 16-18)
- (2) separating and purifying nucleic acids by pressurizing the inside of said accommodation part of the apparatus (claims 19-24 and 34-36)

The species are independent or distinct because these species are directed to different methods for separating and purifying nucleic acids.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims are claims 1-15.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1634

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
